HIGH-QUALITY MARKING SOLUTIONS FOR ALL APPLICATIONS

PROMARK T-2000 MARKING MACHINE

Whether you're on the construction site or in the workshop, Partex's PROMARK T-2000 will deliver high quality thermal-transfer printed markers for panels, boards, components and cable & wiring projects with speed and precision.

If you're on-site and writing directly into the machine, its long-life battery pack provides hours of operation so you can make use of up to 250,000 characters in a wide range of fonts, symbols and design styles in eleven pre-programmed languages.

In the workshop or engineering centre, any device with the easy-to-use Promark Creator Go app installed can connect wirelessly to one or multiple T-2000 printers and print simultaneously to rapidly speed up large-scale projects with no sacrifice to accuracy, precision or presentation.

With its intuitive operation, robust, compact and mobile design and wide range of label and sleeve colours & sizes, the Partex PROMARK T-2000 is the marking machine of choice for any high-quality trade or engineering undertaking.

Bigger, Bolder, Better Thermal Markers

- Text heights up to 6mm
- 150m printer ribbon length
- 300dpi resolution
- Up to three text rows
- 40mm/s high-speed mode
